

Syed Mustafiz ul Hassan Kazmi

Director

The Oxford School System & Associated Networks

Subject: Partnership Agreement & Onboarding Roadmap

Dear Mr. Kazmi,

I would like to extend my sincerest gratitude to you for taking the time to meet with us and for entrusting OmniSchool with the digital transformation of your esteemed educational network. It is an honor to partner with a visionary leader managing such a respected group of institutions, including The Oxford School System, The Paramount School System, The Educators Science School System, and New Modern School System.

We are thrilled to begin this journey with **The Paramount School System (Bassali)**. As demonstrated by our initial tenant creation and data import yesterday, our team is committed to ensuring a seamless and highly professional transition.

Strategic Onboarding Plan

To ensure a flawless setup process involving extensive data migration, we propose a phased implementation strategy. We will focus our dedicated resources on successfully onboarding one campus at a time. Once the Paramount School System (Bassali) is running perfectly on OmniSchool, we will sequentially initiate the onboarding for subsequent campuses. This measured approach guarantees precision and prevents any operational disruptions for your staff.

Regarding our commercial arrangement, we recognize the immense scale of your network and deeply value your status as an early strategic partner. As a gesture of our commitment to a long-term relationship, we are offering a highly subsidized introductory pricing structure:

Commercial Terms

- **Year 1 Introductory Pricing:** A flat rate of **Rs. 1,000 per school**. (A significant reduction from our standard evaluation of Rs. 3,000+ based on initial enrollment tiers).
- **Year 2 & Beyond:** Standard platform pricing is Rs. 10 per student. Honoring your scale and early adoption, we commit to offering a special concession of **20% to 30% off** the standard per-student rate after the first year.

Cost Recovery Strategy: Integrating the platform cost is seamless. Adding a nominal Rs. 10 "Receipt/Technology Fee" on monthly fee slips easily covers our share, acting simply as a receipt printing cost (similar to a standard photocopy). Furthermore, you eliminate the recurring expense of printing physical fee cards. This makes the software effectively free for your administration.

Ultimately, our primary goal for this first year is to demonstrate the undeniable value and operational efficiency OmniSchool brings to your network. We want to dedicate this year to cultivating a strong partnership built on mutual trust. There is no need for immediate concern regarding the Year 2 pricing structure; we are confident that as our collaboration deepens, we will seamlessly arrive at an agreement that satisfies both parties.

Thank you once again for your trust and collaboration. We are excited to support your vision of delivering educational excellence.

Warm regards,

OmniSchool Management
